European Project Management

General Course Information

- **Course Description:** This BIP Event on EU Project Management will focus on what makes an EU application and project successful and what makes them fail. In an ever-evolving landscape of academia and research, the ability to effectively prepare European projects is a pivotal element that will shape the future of Ulysseus European University. This initiative is designed to equip both researchers and grant writers/administrators with the essential skills and knowledge needed to excel in the complex world of European funding opportunities.

- **Methods and outcomes:** For the success of this BIP, we have invited reviewers from the Ulysseus network to lead workshops taking us through the processes. These reviewers will take you through the inner workings of the review process, sharing the insights and nuances that make the difference between a positive or negative review. Their guidance is not only relevant to researchers but also indispensable for grant administrators, as understanding the reviewer's perspective is key to crafting compelling and successful proposals.

- **Virtual Component Description :**
  - **EU programs** (Horizon, Erasmus+,…) : An overview of all funding calls within the EU framework. Where to find calls. How to read calls. Rules and differences. Choosing project: TRL levels etc…
